

poolesville_hacks sponsorship brochure

What is poolesville_hacks?

poolesville_hacks is a school-wide hackathon club that hosts aims to around two hackathons throughout the year. Started by PHS students, the hackathon's objective is to develop creative and technical skills. Participants will design, prototype, and present their projects to a panel of judges and have a chance to win a competitive prize. Hackathons include workshops, pitching, and many more entertainment events. Any high school student can participate and entry is completely free.

Our next hackathon takes place on May 20th, 2022. We currently have around 40 interested participants and expect more through advertising.

Our purpose

Since poolesville_hacks was started by two aspiring programmers, we strive to develop creative and technical skills in our community and share the joy of creating something new. Additionally, we encourage students to find solutions to challenges that are ever present in the real world.

Why should you sponsor us?

Sponsoring a poolesville_hacks event is a great way to support upcoming innovators. You promote business and computer science education as well as create a reason for students to “get their feet wet” into the world of technology.

Benefits

To show our appreciation, we will

- Include your logo and links on our website and social media posts
- Include your logo on our presentations
- Include your logo on our potential swag

Additionally, if your company is programming based, we could

- Organize a workshop to introduce students to your API

If your company provides monetary support, we will

- Provide accurate and detailed receipts on all purchases made with the money

As always, we are open to any suggestions or requirements that your company may have. Please contact us at poolesvillehacks@gmail.com.
